Clio 1995 CD-ROM  
Final Report

A Report to Hitachi

From:

Andrew M. Quay  
Interactive Media Technology Center  
Georgia Institute of Technology

The Interactive Media Technology Center created an interactive CD-ROM of the 1995 Clio Awards for Hitachi Multimedia Systems. The CD-ROM features all gold, silver, and special awards and contains over 100 videos, 20 radio spots, and 200 images of the advertisements. The Clio organization is selling the CD-ROM in trade magazines and on their internet site.

Georgia Tech delivered a master CD-ROM and artwork for the jewel case to Peter Natale of Hitachi who had the product mass produced and packaged at a CD-ROM pressing plant owned by Denon of America. Before this point, many pre-release versions were delivered for evaluation by the clients.

The product runs on both Apple Macintosh and PC's with Microsoft Windows 3.1/95/NT. The CD was authored in Macromedia Director and contains many unique functions including: a very fast database for cross referencing works, an index that is organized by many different categories and also includes a thumbnail viewer, a text parser that automatically scans the award winners book and creates a complete database with indices, pictures that automatically adapt to the color depth (8,16,24 bit) of the user's computer, compressed video for playback on a 1x CD-ROM player, and an all winners autoplay mode.
